Up to **3X** Faster*

RW5 Cloud Cloning Solution

Silca RW5 is the fast, easy solution able to duplicate transponders for around 99% of cloneable vehicle keys in circulation, including ID46 and ID48.

Cloning calculations are made using Silca proprietary servers to guarantee reliability, ensuring that the latest routines are always available and time-consuming software updates are avoided.

The cloning process is guided step by step via a color display with procedures up to 3 times faster than using previous devices. Full integration with the MYKEYS Pro ecosystem gives support and information across the entire vehicle key duplication process helping to deliver the best solution to the customer.
